

Launch of Pretune website

The new cyberspace home of Pretune Technologies is here. In the dynamic world of cyber technology, we are proud to bring to you our new home. This is where we will be articulating our vision for the world in the form of products and services that we offer to the world. We are here to set industry standards, not only for the African continent, but for the world at large. Our website serves to be a tool which simplifies the complex software tools that we are offering in the construction, engineering and mining industry, into a simple language which can be grasped by all. We would like to thank our own internal IT team, headed by Dean and Kabelo in creating this website and giving us a standard which has become the hallmark of the quality of Pretune Technologies. For all the days and night spent on getting this website to be here, you have shown desire and persistence, I would like to take this opportunity to quote Napoleon Hill on the virtues of persistence, "There may be no heroic connotation for the word persistence, but the character is to the character of man what carbon is to steel." Thank you for all the great work you have all done. – The Pretune Family.
